PROFILE

Informatics Engineering graduate from Gunadarma University with hands-on experience building and maintaining modern web applications. Proficient in PHP (Laravel, CodeIgniter), ReactJS, Next.js, Angular, and .NET, with strong knowledge of relational databases including MySQL, PostgreSQL, and SQL Server. Currently contributing as a Fullstack Developer at BPJS Kesehatan, developing mission-critical national healthcare systems. Driven by a passion for clean code, scalable architecture, and delivering impactful digital solutions — both independently and within cross-functional teams.

EDUCATION

Gunadarma University August 2021 – August 2025
Bachelor of Computer Science

- IPK: 3,82/4.00

SMA PGRI 1 BEKASI 2018 - 2021

- Major: Science

EXPERIENCE

BPJS Kesehatan – Central Jakarta October 2025 – Present
Fullstack Developer (Contract)

- Developed and enhanced multiple modules in national healthcare systems to support primary healthcare service operations and claim management using **.NET Framework, C#, TypeScript,** and **SQL Server** Database.
- Implemented business logic, validation rules, and improved data input and validation mechanisms to automate eligibility checks, enhance claim processing efficiency, and improve healthcare data accuracy across facilities in Indonesia.
- Collaborated with cross-functional teams to analyze requirements, implement system improvements, and ensure system reliability in production environments.
- Migrated a legacy healthcare application from **.NET Framework 4** to a modern architecture using **Angular and .NET 10**, improving system maintainability and scalability.
- Manage source code and collaboration workflows using **Bitbucket** and **Gitlab**, ensuring consistent version control and streamlined code reviews processes.

BPBD Cianjur x UG Techno Park October 2024 – December 2024
Web Developer (Internship) | Program Kompetisi Kampus Merdeka (PKKM)

- Conducted analysis of the manual logistics and aid management system at BPBD Cianjur, identifying inefficiencies and transparency issues.
- Designed and developed a web-based information system called "SiKembar" (Sistem Keluar Masuk Barang) using **PHP (CodeIgniter), MySQL, AJAX, and GitHub.**
- Contributed to both front-end and back-end development of core modules, including system and database integration using MySQL.
- Performed system testing and deployed the application to the server for direct use by BPBD.

Bisnis Indonesia Group – Central Jakarta February 2024 – June 2024
IT Programmer | Program Magang Kampus Merdeka – MSIB Batch 6

- Implemented mock-up designs and managed website–database interactions using **Laravel** and **Oracle Database**, significantly reducing page load times.

- Maintained and updated the company's internal information system for goods receipt and release processes, adding over 10 new features and fixing more than 20 bugs, which improved system performance and usability.
- Built and managed a web-based **ERP system** using Laravel as the backend framework and **Oracle Database** as the primary data storage, increasing the efficiency of logistics and management data processing.
- Performed database administration operations, including creating databases, tables, columns, and other components, enabling more structured and systematic data management.
- Managed code repository administration on the **GitLab** platform, ensuring clean version control and reducing integration errors among the development team.
- Actively contributed to the internal BigForum Revamp project, focusing on modernizing the company's digital platform using **Next.js and TailwindCSS**.

PROJECTS [Link]

Wild Oasis [Link]

- A cabin booking platform built with ReactJS, React Query, and Supabase. Features an admin dashboard for managing bookings, sales analytics, occupancy monitoring, and stay duration summaries — all in a responsive, modern UI.

The Wild Oasis Next [Link]

- A hotel booking web app built with Next.js and Supabase, featuring secure authentication via NextAuth, server-side data handling, and a responsive Tailwind CSS UI for exploring cabins and managing bookings.

BigForum Revamp [Link]

- A full redesign of a legacy internal forum for an Indonesian business group. Built with Next.js and TailwindCSS, delivering a modern, fast, and responsive interface with improved content structure and user experience.

CERTIFICATES & TRAINING

- **Junior Web Programmer** – Badan Nasional Sertifikasi Profesi (2025 -2028)
- **The Ultimate React Course 2025: React, Next.js, Redux & More –** Udemy (2025)
- **Internship Program Certificate –** Kampus Merdeka Batch 6, Ministry of Education, Culture, Research, and Technology (2024)
- **Software Engineering Fundamental Course** – RevoU (2023)

SKILLS

Languages & Frameworks: HTML5, CSS, JavaScript, PHP, Laravel, CodeIgniter, React.js, Next.js, Vue.js, Nuxt.js, Angular, C#, .NET, Node.js, Express.js, Hapi, AJAX, JQuery, Bootstrap, TailwindCSS.

Tools: Git, GitLab, GitHub, BitBucket, DBeaver, Azure Data Studio, Postman, Visual Studio, Visual Studio Code, Antigravity, Microsoft Office.

Databases: MySQL, PostgreSQL, Supabase, SQL Server.

Soft Skills: Problem Solving, Teamwork, Time Management.

Language: Fluent Bahasa Indonesia and Conversational English.
